

Homework, 3/3/10

**Directions:** You must complete a type 3 assignment that is due tomorrow. This assignment must be a reflection of the following:

1. What you got for **grades** on your vocab cards, rock cycle diagram, and test. If you got a zero, write that grade. Write a sentence that tells me this!
2. Whether or not you studied for the test. If you **DID study**, you must write about specifically what you did to study, how long (approximately) you studied, and where you studied. If you **DID NOT** study you must write about why, whether or not you understand how to study, and/or what you could do in the future to study more.
3. Tell me what part of this unit was **easy/hard for you**. We did many things during the unit, including weathering/erosion on the web (web-site activity), sand lab, CSI lab, vocab cards, RC diagram, scattegrories test prep, etc. Did you enjoy this unit? Dislike it? Why or why not? Did you mess up and not hand something in, why?

### **FCAs**

List grades for 3 assignments, Underline (15 points)

Did you study? Explain (50 points)

At least 3 sentences HIGHLIGHTED

Was the Unit easy? Hard? Enjoyable? (35 points)

At least 3 sentences.

### **Short Form**

List UL (15)

Study? HL (50)

Opinions (35)

**Don't Forget NO EXCUSES!**
